

STARTING HANDLE MORRIS 8 1934-38

I have been contacted with a request for dimensions for the starting handle for a Series II Morris 8.

Below you will see a dimensioned sketch of the original handle supplied with my 1938 Series II saloon.

I believe that this will effectively be the same for all Morris 8 vehicles up to the end of Series II production.

MAIN BAR 5/8" DIA.

HANDLE SLEEVE 3/4" DIA.

LUG (TO FIT DOG) 7/32" DIA.

NOTE: LUG IS HORIZONTAL WHEN
HANDLE SLEEVE IS DOWN
I.E. AT 90° TO DRAWN POSITION

I hope that this is of use.
